## Education

| | |
|---|---|
| **Indian Institute of Information Technology, Vadodara** | **July 2022 - Present** |
| *Bachelor of Technology- Computer Science and Engineering — **CPI: 7.69** (7th Sem)* | *Gujarat, India* |
| **Jijamata Sabane College** | **2020 - 2022** |
| *XII — **Percentage: 92%*** | *Maharashtra, India* |

## Technical Skills

**Languages**: Java, C++, C, Dart, Python, JavaScript, HTML/CSS, SQL
**Frontend**: Flutter, ReactJS, Figma, Canva
**Backend & Databases**: Node.js, Express.js, Firebase, MongoDB, MySQL, SQLite, Supabase, RESTful APIs
**State Management**: Riverpod, GetX, Provider, BLoC
**Cloud & DevOps**: Azure, Docker, Kubernetes, Git, GitHub, Selenium, AWS EC2
**Data & Analytics**: Power BI
**Developer Tools**: VS Code, Android Studio, Cursor, Gemini CLI
**Coursework**: Data Structures & Algorithms, Computer Science Fundamentals, Agile Methodologies, OOPS
**Domains**: Full-Stack Development, Mobile App Development, Database Design, UI/UX

## Experience

| | |
|---|---|
| **ETY Services** | **May 2025 – July 2025** |
| *Software Development Engineer Intern* | *etyservices.com* |

- Architected a full-stack logistics platform using Flutter and Firebase, enabling $Rs.$10L+ in annual GMV
- Directed a 3-member team through Agile sprints, enhancing delivery velocity by 30% through effective problem-solving and cross-functional communication.
- Engineered geofencing logic using Google Maps API, reducing failed deliveries from 22% to 10%
- Automated escrow system for payment gateway (UPI/NetBanking), reducing disputes by 60%

| | |
|---|---|
| **Aintelligence Technologies** | **Dec 2023 – Feb 2024** |
| *Flutter Development Intern* | |

- Demonstrated strong prioritization and problem-solving skills by architecting a full-stack medicine delivery system with vendor authentication and automated driver assignment, ensuring 95% role accuracy.
- Developed a role-specific Flutter application with real-time Firebase synchronization, cutting delivery times by 37.5%
- Fortified payment workflows and introduced inventory monitoring, lowering transaction failures by 30%

## Projects

**Bhaada Partner App** | *Flutter, Firebase, Hive, GetX, Google Maps API, Cloud Functions* **Live App**

- Engineered a multi-stage logistics application featuring OTP-based delivery and live vehicle tracking, streamlining over 100 weekly shipments
- Deployed Firestore Serverless backed reactive state handling and introduced a UPI-enabled wallet, processing $Rs.$25K+ in monthly transactions
- Formulated dynamic subscription schemes and automated real-time notifications via Firebase Cloud Functions, accelerating system response by 75%
- Constructed a secure payout workflow with persistent address storage and driver-wise commission computation

**DevTinder** | *React, Node.js, MongoDB, Express, JWT, Socket.io* 🔗

- Ideated and launched a MERN-stack matchmaking platform for developers with a swipe-based UI for collaboration, attracting 100+ users
- Implemented token-based user authentication via JWT and activated real-time match notifications using Socket.io
- Crafted a responsive, device-adaptive chat interface to enable seamless user communication, styled with Tailwind CSS.
- Modeled and normalized MongoDB schemas using Mongoose to support scalable profile and match data management

## Achievements & Hackathons

**HackThisFall Hackathon** - Subcategory Winner (2024)

**TCS CodeVita** - All India Rank 97 (2024) — National Programming Contest

**Cerebro Technical Event** - Debuggathon Winner (2023) — IIIT Vadodara
